SELECT HOMES

By
JMC Contracting Inc.

This letter is long overdue, as we have been in our home built by JMC since the summer of 1996.

The building of our home was something special, especially as it was the first home we had had built together. The project was a great experience from start to finish, and came exactly as advertised and then some. As we have both said since we moved in this truly was our dream home.

John, you are very demanding of your people, and this shows in the quality homes that you produce. You worked very hard with us to ensure that it was "our home" that you were building. After we moved in we appreciated how quickly you took care of any minor things that required attention. We have had to do nothing but enjoy our home since we moved in, and get nothing but compliments when visited by family and friends.

We have been remiss in not thanking you before now. We would like to take this opportunity not only to say thank you, but also to say that we have and will continue to recommend your houses to anyone.

Sincerely,
